

Neternals™

UNIQ\$EL

UNIQSEL is a Total Business Automation solution that integrates purchase, inventory and sales. It is a comprehensive solution designed for retail businesses- small, medium and large.

UNIQSEL is promoted under the brand name Neternals, which provides user-friendly products and time bound services.

UNIQSEL comes with powerful tools that ensure accuracy, security, scalability and flexibility of business operations.

UNIQSEL helps merchants increase efficiency of business operations, exercise complete control over business operations, thoroughly analyze purchase, sales and inventory activities, increase employee morale, maximize revenue earning opportunities and promptly take key decisions.

UNIQSEL improves your company's bottom line. Whether between departments or individuals, UNIQSEL ties together the functional areas of your business by eliminating manual processes.

Purchase

Define default information for each supplier such as tax, discount, margin, brand etc. Received products can be classified into category, subcategory and item.

Manage complete information of goods received from various suppliers including miscellaneous information like discount, tax, attributes, price. Manage purchase returns of suppliers including discount.

- Supplier groups.
- Goods Receipt for permanent and temporary products.
- Pro-forma invoice from supplier group and adjustment to individual suppliers.
- Automatic price calculation based on tax and discount pre-defined for that supplier.
- Generate price tags for products.
- Print price tags in barcode formats.
- Encrypt cost price.

Inventory

Inventory is provided in-built. UNIQSEL's inventory module comprises of the following key features :

- Inventory reports are automatically processed and provided.
- First in First Out valuation for permanent products.
- Automatic product aging.
- Batch wise stock handling and valuation for permanent products.
- Automatically carry forward opening balance of stock across years.
- Stock maintenance in more than one stock center.
- Stock transfer across different stock centers within the company and across companies.
- Physical stock taking and adjustments.
- Stock reports for any given date at any point of time.
- Create temporary product codes for products without barcodes.
